About Us.

Introduction

The Institute of Applied Information Technology and Environment is a science and technology organization under the Vietnam Union of Science and Technology Associations (VUSTA). The Institute was established with the goal of researching, applying, and transferring technological solutions in the fields of information technology, data, and environment. With a multidisciplinary team of experts, the Institute provides consulting services, research, and implements digital transformation projects, building information systems and databases to serve state management and socio-economic development. The Institute has participated in numerous consulting and technology implementation projects for ministries, sectors, localities, and domestic organizations. Through its research and application activities, the Institute aims to promote innovation, digital transformation, and sustainable development.

Core Capabilities.

Artificial Intelligence (AI) Research and Application: Research, development, and application of artificial intelligence technologies to support data analysis, process automation, and improve management efficiency.

Digital Transformation Consulting: Consulting on building digital transformation strategies and roadmaps for organizations, including system architecture design, data platforms, and digital technology solutions.

Data Platforms: Designing and implementing database systems, data warehouses, and data management platforms to support information management, analysis, and exploitation.

Software Development: Developing, integrating, and deploying software systems and IT applications to support digital management, operation, and service delivery.

Training and Technology Transfer: Organizing training programs, workshops, and knowledge transfer in the fields of information technology, artificial intelligence, and digital transformation.

Consumer & Market Insights.

CONSUMER

- Central Government Agencies and Ministries
- Local Government Authorities (Provincial and Municipal Levels)
- Media Organizations and Public Service Units
- Research and Educational Institutions, and Libraries
- Technology Companies and Digital Service Providers

MARKET INSIGHTS

- Public Sector Digital Transformation
- Information System and Database Development
- Software Platform and Technology Service Development
- Technology Applications in Natural Resources and Environmental Management

Certificate of Achievement.
